

NEW PRODUCTS INSPIRATION GUIDE 2025

INTRODUCTION

ENDLESS POSSIBILITIES ON... NEW PRODUCTS

Welcome to our 2025 Inspiration Guide, a selection of exclusively NEW products, designed to meet your needs and to inspire your customers.

A collection of over 140 new products: from entry- price level products to Recycled Classics and new additions for our retail brands, you will find a match for every budget. With many customisation options to offer, the collection is perfectly suited to put your customer's brand in the spotlight.

Supported by mood scenes, created with our in-house logo tool, GIFs, videos, and mood imagery. These resources are available and ready for you to use in your marketing communications.

The possibilities are endless...

GREEN POINTS

With every product in this catalogue, we mention a value in Green Points. These points can be used to navigate the collection and identify the more sustainable options. We have identified 8 different elements that give a transparent overview of the impact of a product. Elements scored are for instance the material, the country of origin or the recyclability of a product. Every product has a Green Passport on our PF Store explaining in detail how we score the products. This makes it easy to compare products and make a choice based on your own sustainability strategy.

MOVING TOWARDS A FUTURE PROOF PRODUCT MEDIA INDUSTRY

At PF Concept, we are committed to foster ESG + P (Environmental, Social, Governance + Product) principles to future-proof our industry. Our focus is on addressing critical material topics such as climate change, circular economy, and the well-being of our own workforce and workers throughout the value chain.

We do this by focusing on three things:

LEADING BY EXAMPLE, SUPPORTING OUR CUSTOMERS 'RETHINKING PLASTICS 2030' STRATEGY

Leading by example

We are not just setting ambitious goals; we are taking concrete actions. Transparency is key to our approach. We share data openly and collaborate with trusted third parties to validate our progress and ensure accountability. We have partnerships with global initiatives, like UNICEF the Netherlands, and are committed to the sustainable development goals (SDG 8, 12, 13, 14, 15 & 17) of the United Nations.

An aerial photograph of a winding asphalt road cutting through a dense, lush green forest. The road curves from the upper right towards the lower left. The image is framed by large, semi-transparent green geometric shapes: a triangle on the left and a larger shape on the right and bottom. The text is centered over the road.

Supporting our customers

The world is changing, and so are we. We aim to reduce the environmental footprint of our activities across the entire supply chain. We are committed to transparency, sharing data, and partnering with third parties for proof and validation. We support our customers with tools for their sustainable journey.

Rethinking Plastics

The way forward is phasing out all virgin fossil-based plastic by 2030.

Future-proofing our industry requires a critical evaluation of the materials we use in our products and packaging. These materials can contribute to climate change, pollution, and increased waste. We are committed to reducing our environmental impact by using innovative, sustainable materials, designing our products to be more circular, and eliminating all virgin fossil-base plastics from our products and packaging by 2030. We are changing how we design, use and reuse plastics.

Let's move forward to a lower impact >>

Discover how we're committed to lower our impact and support our customers with easy-to-find information on our sustainability pages.

Discover our sustainability pages

A hand reaches down towards a discarded plastic bottle on a beach at sunset. The scene is framed by teal diagonal overlays. The text "Let's move forward» to a lower impact" is overlaid on the image.

CREATE YOUR OWN

A WORLD OF POSSIBILITIES.

With Create Your Own, just about anything is possible. Looking to create your own custom-made product with custom materials, products in your company's PMS colour, special accessories or a unique printing – Create Your Own makes it possible. And only in a few simple steps. As the leading procurement specialist for the largest range of product media, we offer competitive prices, short delivery times, low minimal quantities and full compliance. With our Create Your Own collection you can create your own custom-made products in a few simple steps.

THE LEGENDARY NOTEBOOK

The Moleskine notebook is the heir and successor to the legendary notebook used by artists and thinkers over the past two centuries: among them Vincent Van Gogh, Pablo Picasso, Ernest Hemingway and Bruce Chatwin.

Today, it is celebrated in pop culture as a contemporary icon, an inviting blank space where your own words and sketches join you to an ever-evolving relay of creativity.

Our digital tools help you to inspire your customer. Our large inventory and fast branding enable any project. Our sales experts are at your service to support you to win with your customer. Ordering is efficient thanks to our outstanding web shop.

DIGITAL TOOLS TO EMPOWER YOUR SELLING.

As we are serious about being your preferred product media expert, we have developed tools to help inspire your customer, saving you valuable time and allowing you to focus on selling.

3D LOGO TOOL

Instantly create
3D models of a product
with your branding.

3D logo tool.

Instantly create 3D models
of a product with your branding.

MOOD SCENE GENERATOR

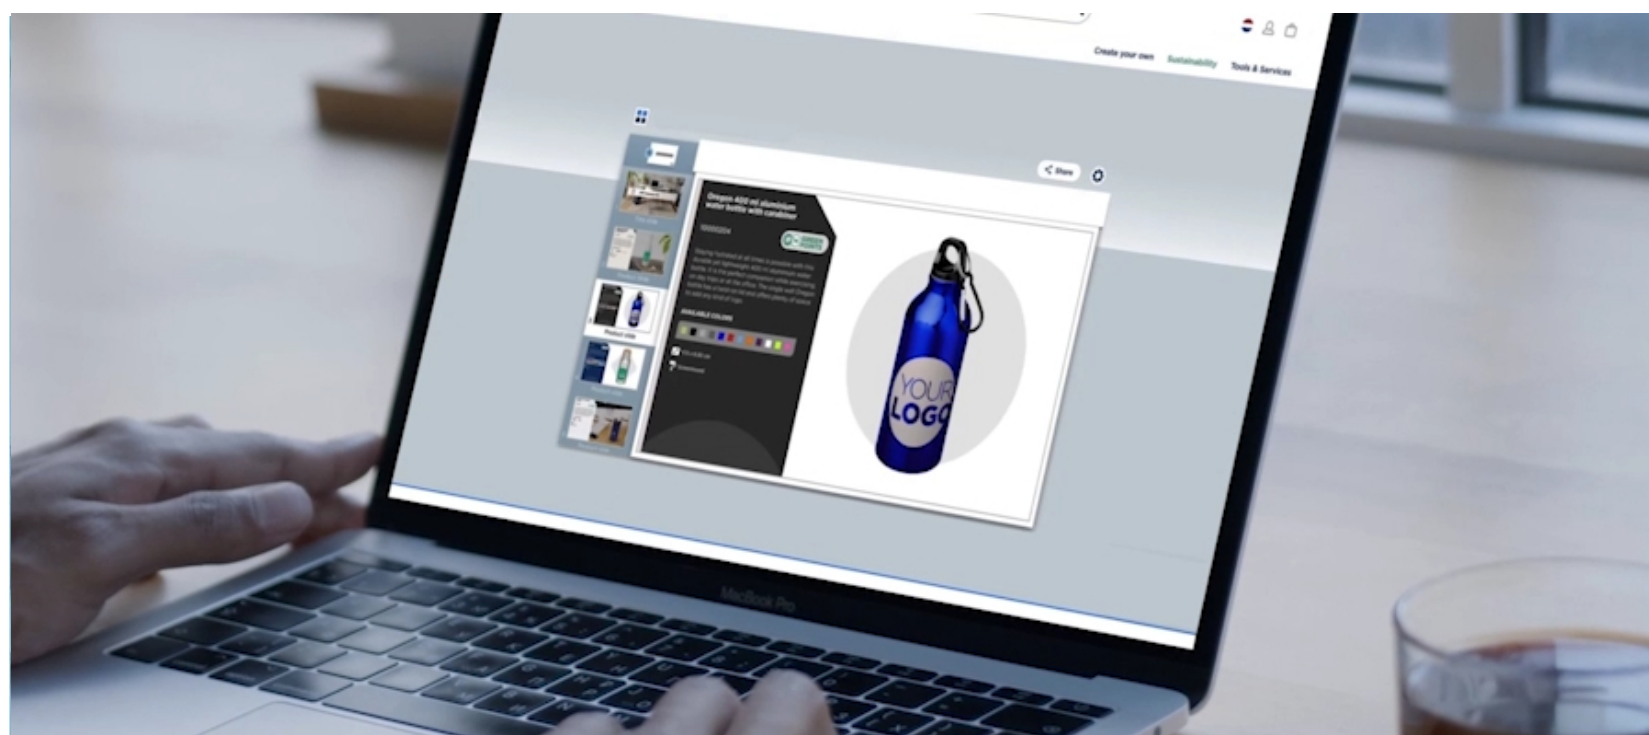

Upload a logo, position
it and let our tool create
a gallery of mood scenes
based on your design and
uploaded logo.

Mood scene generator.

CATALOGUE CREATOR

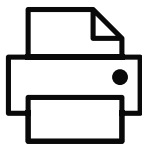

Inspire your customers
with branded catalogues.

PRINT TECHNIQUES

PF Concept - Poland Operation is an One-Stop-Shop and full service product printing service with a complete range of stock. Located in Poznan, Poland, PF Concept has built a stock and printing facility.

With the One-Stop-Shop solution PF Concept takes away all hassle. We offer all-in printing services based on all-in product prices. Branding done by PF Concept is fast with the possibility for next day shipment, delivered all over Europe, directly to the end customer if required. This service is unique in the market and will help to quickly deliver branded products.

DIGITAL PRINTING

Digital printing is a method in which precise ink droplets are sprayed onto a surface to create an image, and the ink solidifies when exposed to UV light

DIGITAL STICKERS

A digital sticker is a label with adhesive backing that is produced using digital printing technology. These stickers are created from digital files and can include a variety of designs and text.

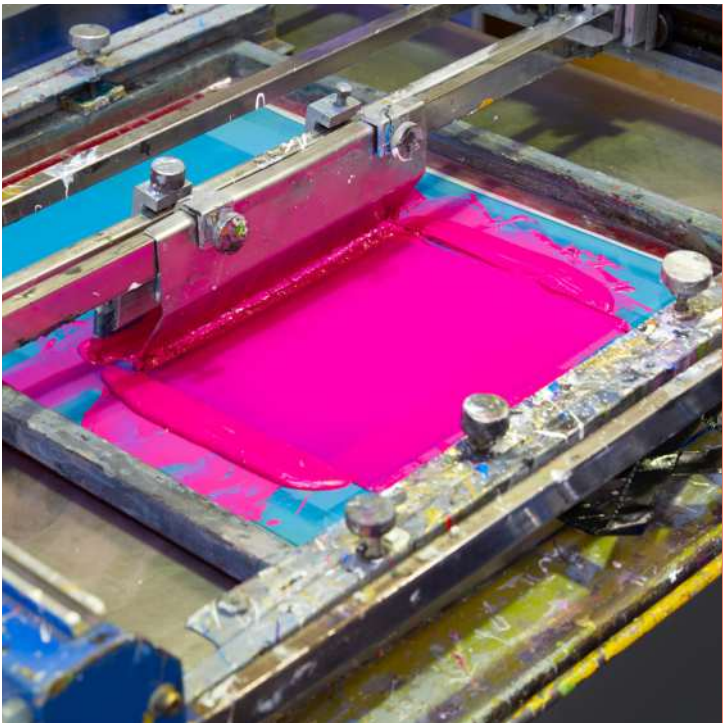

SCREENPRINT

Screen printing is a printing method that uses a mesh screen to transfer ink onto a substrate. This process is commonly employed to produce vibrant and long-lasting prints on a wide variety of items.

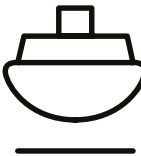

DEBOSSING

Debossing is a printing technique that entails using a heated die to press a design into the surface of a material, resulting in an indented effect

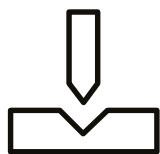

TRANSFER

This process involves printing the desired design on an initial non-fabric surface and then using it to transfer the design onto your textile merchandise.

PADPRINT

Pad printing is a printing method that involves transferring ink from an engraved plate, typically made of metal or silicone, to the surface of 3D objects with irregular or curved shapes.

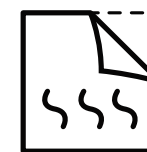

LASER ENGRAVING

Laser engraving is a precise technique that utilises a focused laser beam to remove material and produce permanent and intricate markings on a variety of surfaces. The process vaporises material, generating high heat to incise designs.

IN MOULD LABELLING

In-mould labelling is a technique used in plastic container manufacturing, where a pre-printed label is positioned inside a mould before shaping the plastic container. During production, plastic material is heated, placed into the mould, and merges with the label to create a unified product.

SUBLIMATION

Sublimation printing is a digital printing process that uses heat and pressure to transfer dye onto different materials. It is commonly used to print on polyester fabrics, but can also be used on other materials such as ceramic, metal, and plastic.

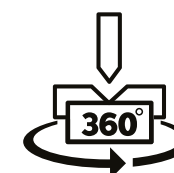

RELIEF MOULDING

Relief moulding refers to the process of creating a raised design on materials. This is often achieved by using special dies to press the design into the material, resulting in a tactile, three-dimensional effect.

EMBROIDERY

Embroidery involves the creation of patterns by stitching threads onto a fabric.

360 LASER ENGRAVING

360-degree laser engraving allows for precise engraving on more complex rounded products.

360 DIGITAL PRINT

360-degree digital printing enables full-colour printing on the entire surface of an object and is frequently employed for customising products.

SCREENROUND

Screenround utilises the same technique as screen print, except the product is turned and moved during the printing process.

HOT STAMPING

Hot stamping is a printing process that uses heat and pressure to apply foil between a die and the surface to be stamped.

Disclaimer
